

Keratin Fusion Bond

HAIR EXTENSIONS

CARE GUIDE

SLEEPING

Never sleep on wet hair! Make sure your hair is completely dry before you go to bed. It is also highly recommended to tie your hair back to prevent tangling.

BRUSHING

A soft bristle brush should only be used to brush extensions. Remember to always treat your extensions with care, as over aggressive brushing can result in the extensions being pulled out and your natural hair being damaged. We recommend you hold your hair extensions in a closed fist whilst brushing. In the unlikely event that your extensions come out, please keep the hair for reapplication on your next visit.

WHAT PRODUCTS DO I USE ON MY HAIR EXTENSIONS ?

Sassy Me recommends using:

Nutri Care by Fanola shampoo & conditioner on hair extensions.

Sassy Me does not recommend using treatments on hair extensions, to keep your hair extensions feeling silky and smooth we recommend using oils on the mid lengths to ends: for example: Simply sassy oil which can be purchased at sassy me.

A heat protectant spray is necessary if you are going to be using thermal equipment such as hair dryers or hair straighteners, as the hair extensions are real hair, like human hair the ends can snap with excessive use. Sassy me sells several heat protect sprays.

There are four main ingredients that are used in hair care products that our hair extensions do not like and we **DO NOT** recommend.

The Four ingredients to avoid :

**PANTHENOL / PANTHENYL
PRO VITAMIN B
PROTEIN
KERATIN**

These four ingredients are known to dry out sassy me hair extensions, therefore are not recommended.

If these products are used on your extensions your warranty is void.

DO NOT ATTEMPT TO REMOVE THE EXTENSIONS YOURSELF AS YOU WILL DAMAGE YOUR HAIR

VERY IMPORTANT PLEASE NOTE :

KERATIN BONDS CAN NOT BE TIGHTENED.

Hair Extensions are NOT wash & wear, they require daily styling

- Do Not allow your scalp to become too Oily
- Do Not apply heat directly to the bond
- Do use ONLY the Hair Products Recommended by Sassy Me
- Do use a soft bristle brush
- Do Hold your hair while you brush it until you get used to it
- Do Not Brush your hair while it's wet
- Do Not put a hair straightener directly on the Microbeads
- Do Separate your Keratin Bonds once a week and run your fingers between each row of extensions to avoid matting & damage to your natural hair

IF YOU HAVE ANY SERVICE ON YOUR HAIR EXTENSIONS WITH ANOTHER HAIRDRESSER YOUR WARRANTY IS VOID.

MAINTENANCE

Keep the hair clean. Please wash the hair immediately after swimming, spa, exercise, and etc. When dirt and sweat accumulate, hair tangles.

We recommend you have your hair extensions fixed and maintained every 6-12 weeks (*depending on how fast your hair grows*) to avoid matting and tangling. When your extensions need tightening or removing, consult a Hair Extension professional. THIS IS NOT a job for someone without experience as damage to your natural hair can occur if the procedure is done incorrectly.

YOU SHOULD KNOW THE FOLLOWING:

Hair Extensions are Dehydrated from being cut away from the hair, therefore they will always be dryer than your natural hair.

The Colour match may not be perfect, therefore you may have to have your hair coloured. Your own hair may need to be cut by one of our hairdressers after the extensions are in. This will depend on layers and your original hairs length.

Just like your natural hair, you lose up to 100 strands of hair per day. This means the extensions will decrease in size and thickness over time. The strands that your natural hair loses will build up and only fall free when the extensions get tightened or removed.
